PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience delivering responsive, scalable, and accessible web applications. Progressed from foundational HTML/CSS/JS to advanced UI libraries and UX-focused interface design. Actively integrates AI tools (ChatGPT, Cursor AI, DeepSeek, Claude) to accelerate delivery and reduce debugging cycles. WCAG 2.1 specialist with strong Agile/SCRUM background and design-to-code expertise.

TECHNICAL SKILLS

Frontend: HTML5, CSS3/SCSS, JavaScript (ES6+), TypeScript

Frameworks & Libraries: Bootstrap 5, Tailwind CSS, Syncfusion, Highcharts

Database: SQL

AI-Assisted Dev: ChatGPT, Cursor AI, DeepSeek — code generation, refactoring, debugging, prompt engineering

Performance & A11y: WCAG 2.1, Core Web Vitals, lazy loading, cross-browser compatibility (Chrome/Firefox/Safari/Edge)

Tools & Methods: Git, GitHub, JIRA, Confluence, Figma, Adobe XD, Agile/SCRUM, mobile-first design

Roles And Responsibility

Independent Frontend Developer & Skills Enhancement *Jul 2025 – Present*

Deliberate break post-iMocha to deepen expertise, deliver freelance projects, and stay current with evolving frontend tooling.

- Delivered multiple freelance client websites (HTML, CSS, JS) — Mangalam HDPE Pipes landing page with sticky nav, Gushwork marketplace page, and more.
- Self-studied AI-augmented development with Cursor AI and DeepSeek.
- Built ReviewBoost — an AI-powered tool using the Anthropic Claude API for automated review draft generation.

UI Developer | iMocha *Apr 2023 – Jun 2025*

- Applied lazy loading, optimization techniques and SCSS architecture to achieve ~30% page load improvement on the Talent Analytics dashboard.
- Led WCAG 2.1 audits and remediation across 3 major product modules — ensuring enterprise compliance for clients in regulated industries.
- Integrated ChatGPT, Cursor AI, and DeepSeek into daily workflows for code generation, refactoring, and debugging, reducing turnaround time by ~20%.
- Conducted peer code reviews enforcing best practices and performance standards; reduced post-release bug count across the team.
- Worked on UX/design tool Figma and Adobe XD, translating wireframes into pixel-perfect, production-ready interfaces.

Associate UI Developer | iMocha *Sep 2021 – Mar 2023*

- Built and maintained responsive UIs for 3 enterprise products (HTML5, CSS3, Bootstrap, Tailwind CSS) serving 10,000+ active users.
- Grew skills and certifications — improving codebase consistency.
- Redesigned 4 Talent Admin modules, improving UX quality and reducing user-reported friction by ~35%.
- Delivered rapid front-end hotfixes meeting SLA compliance for urgent client escalations across production environments.
- Created and implemented UI/UX improvements using Figma references, wireframes, and frontend technologies to deliver intuitive and user-friendly digital experiences.

UI Developer Intern | Egenie4u *Jan 2021 – Mar 2021*

Pune, India

- Developed frontend solutions for the Marketing Analytics team, integrating web tracking scripts with marketing intelligence platforms.
- Designed and implemented usability-focused interface enhancements across enterprise product modules to improve navigation flow, accessibility, and overall user interaction experience.

Projects

Talent Portal

- Developed and enhanced frontend features for a Talent Portal focused on employee skill exploration and personalized skill profiling.
- Worked on modules enabling users to explore technical competencies, program participation, and individual skill progress tracking.

- Implemented feedback and review functionality for skill assessments to improve employee learning visibility and engagement.
- Collaborated with cross-functional teams to deliver responsive UI components, API integrations, and performance optimizations.
- Successfully handled high-priority production tasks and delivered quick enhancements alongside planned sprint activities.

Talent Analytics

- Contributed to the Talent Analytics platform by developing features for skill gap analysis and workforce capability tracking.
- Worked on forecasting-based career path modules to support vertical growth and role progression insights for employees.
- Developed role-based access functionalities, admin access center features, and advanced analytics-driven modules.
- Supported certification tracking workflows and implemented scalable UI components for enterprise reporting dashboards.
- Delivered critical enhancements, bug fixes, and urgent business requirements within tight timelines while maintaining application stability.

Payment Portal

- Worked on an internal Payment Portal application designed for managing organizational payment-related workflows and operations.
- Developed responsive frontend screens and integrated APIs for smooth transaction handling and internal process management.
- Improved usability, validation handling, and performance of payment modules across enterprise workflows.
- Coordinated with backend and QA teams to ensure secure and stable application functionality.
- Managed priority-based tasks, production fixes, and quick turnaround enhancements alongside regular development activities.

Talent App

- Developed and maintained frontend modules for the Talent App, focusing on employee engagement and talent management workflows.
- Worked on test setup configurations, automated email notifications, reminders, and reporting functionalities.
- Enhanced user experience through responsive UI development, reusable components, and accessibility improvements.
- Collaborated with cross-functional teams in agile sprint cycles to deliver feature enhancements and issue resolutions.
- Successfully delivered on-the-fly requirements and urgent fixes while maintaining project delivery timelines.

Talent Admin

- Contributed to the Talent Admin platform by developing super admin and feature management functionalities.
- Worked on access control modules enabling admin users to enable or disable Talent App features based on business requirements.
- Developed role and permission-based administrative screens to support secure enterprise operations.
- Improved frontend scalability and maintainability through reusable UI architecture and optimized workflows.
- Handled critical production support tasks, quick feature rollouts, and priority-based enhancements in fast-paced delivery environments.

EDUCATION

B.E. – Information Technology, Savitribai Phule Pune University (SPPU) 2020

Diploma – Computer Technology, MSBTE 2016

CERTIFICATIONS & KEY ACHIEVEMENTS

- Creating Accessible Websites – Udemy | Frontend Development Course – ECTI Institute
- WCAG 2.1 specialist — one of few frontend devs with dedicated enterprise accessibility audit & remediation experience.
- Currently learning SQL, Power BI, and analytics engineering concepts and building AI-assisted dashboard projects
- Eager Learner & Quick Adapter – demonstrated ability to rapidly master emerging technologies (AI tools, analytics frameworks, data visualization libraries); actively pursue upskilling in SQL optimization, modern frontend trends, and business intelligence concepts.
- Uses AI-assisted workflows to accelerate debugging, documentation, and frontend delivery.
